QUESTION PAPER SPECIFIC INSTRUCTIONS

Please read each of the following instructions carefully before attempting questions:

*There are **TWENTY** questions printed in **ENGLISH**. All the questions are compulsory.*

The number of marks carried by a question/ part is indicated against it. Word limit in questions, wherever specified, should be adhered to. Any page or portion of the page left blank in the Question-cum-Answer Booklet must be clearly struck off.

Q No.	Marks	Q No.	Marks	Q No.	Marks
Q1	/10	Q8	/10	Q15	/15
Q2	/10	Q9	/10	Q16	/15
Q3	/10	Q10	/10	Q17	/15
Q4	/10	Q11	/15	Q18	/15
Q5	/10	Q12	/15	Q19	/15
Q6	/10	Q13	/15	Q20	/15
Q7	/10	Q14	/15	Total	/250

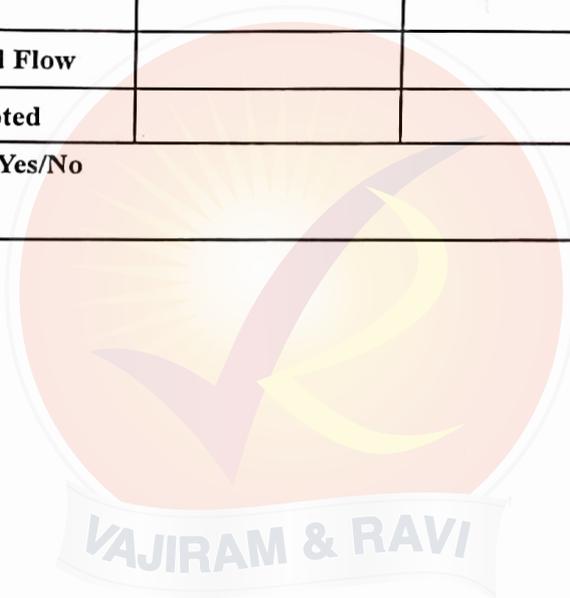

Instructions:-

- Legible Scanning:** Exercise due diligence in scanning your scripts for clear legibility
- Submissions** marred by poor scanning, notably those with illegible sections or blackened pages due to improper scanning, risk being excluded from the evaluation process.
- Non-Adherence Consequences:** Failure to comply with the aforementioned instructions may lead to the disqualification of your submission.

For Student Only

Start Time - 15:30	End Time - 18:40
Mode of Examination	Online <input checked="" type="checkbox"/> Offline <input type="checkbox"/>
Receiving date -	Dispatch date -

Parameters		Good	Average	Needs Improvement
Conceptual Understanding				
Contextual Clarity

Evaluator/Reviewer Suggestions

👍 😊 All the Best 😊 👍

Evaluator/Reviewer Suggestions

👍 😊 All the Best 😊 👍

Q-1 Recently, SC recognised Maternity leave as a fundamental Right under Article 21.

Maternity Benefit Act, 1961 provisions

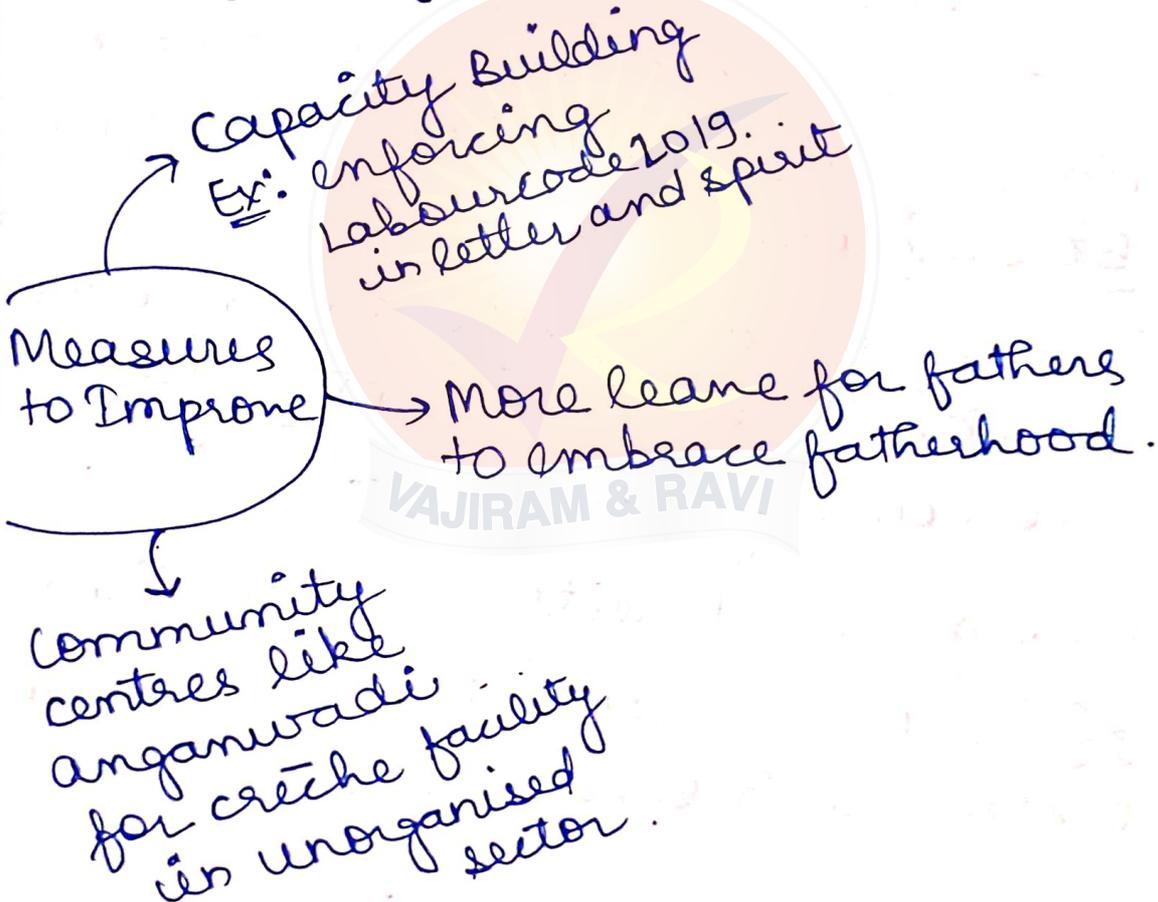

1. 26 week leave for mother of new ~~birth~~ born including pre and post pregnancy.
2. 15 days leave for father of a new born as paternity leave.
3. Creche services to be available in organisation with more than 50 employees.

This provide adequate safeguards but still insufficient due to following reasons -

1. Unorganised sector - more than 88% women work in unorganised sector with less than 10 employees
2. Discrimination - between genders of father and mother in granting leave. This enforces patriarchy
Ex: female spent 201 minutes more on unpaid labour (MOSPI)

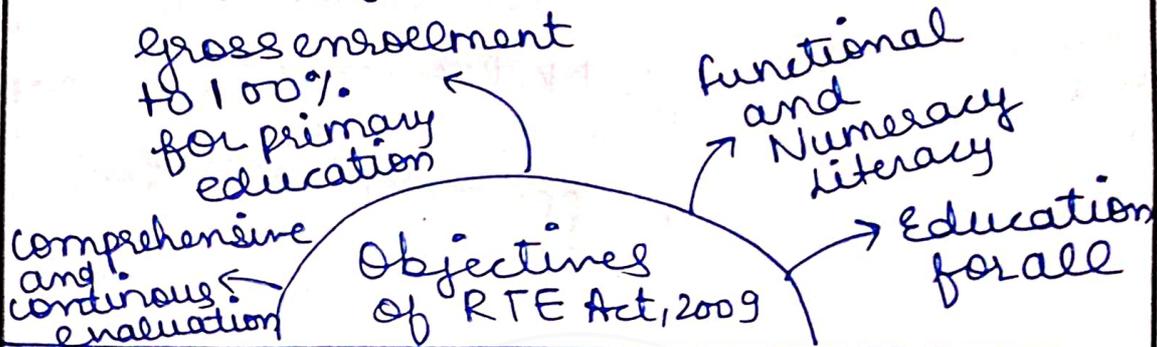

3. Poor enforcement : Women are forced to leave the job during pregnancy and child caring years.

4. Other factors : like not considering if it is a special child, etc. or any complications during pregnancy.

As IMF stated, equal participation of women can boost India's GDP by 27% on the path of Viksit Bharat..

Q.2. Right to education Act, 2009 provide for free and compulsory education for children between 6 to 14 years.

Trend of privatising education

Positives of privatising	Undermining Objectives of RTE, 2009
<ol style="list-style-type: none"> <u>Quality education</u> with focus on multidimensional learning Reserve seats <u>25%</u> for students of weaker sections empower 'weakest of weak' through <u>merit based system</u> for admission 	<ol style="list-style-type: none"> <u>Inaccessible to poor</u>: Ex: Recent protest of parents in Delhi against <u>fee hike</u> Undermine principle of 'education for all' Ex: shown is <u>monie English Medium</u>

3. 'Exclusion' of various students due to high competition for admission.
4. No provision of scheme like PM-POSHAN for nutritional need of students.

Hence, it is clear the private education is undermining objective of RTE Act, 2009. Ways to improve Government and private education -

1. Legislative measures to manage fees structure in private schools
2. Infrastructure Building in government school. Ex: 'Delhi' Model of schools
3. Use of Information Technology
Ex: DIKSHA portal.

Enforce recommendations of Kasturirangan Committee for goal of 'Sabko Shiksha, Achi Shiksha'

Q.3. India ranked at 105th in global hunger Index, while we became Rank 3rd in global GDP.

15% of total population
Multi-dimensional poor
(NITI Aayog)

Persistence of Hunger and undernutrition

Anemia
Ex: more than 59% women
(NFHS-5)

Stunting
Ex: >16% of total children (NFHS-5)

Wasting
Ex: more than 30% children (NFHS-5)

Reasons for disconnect between economic growth and nutritional outcome-

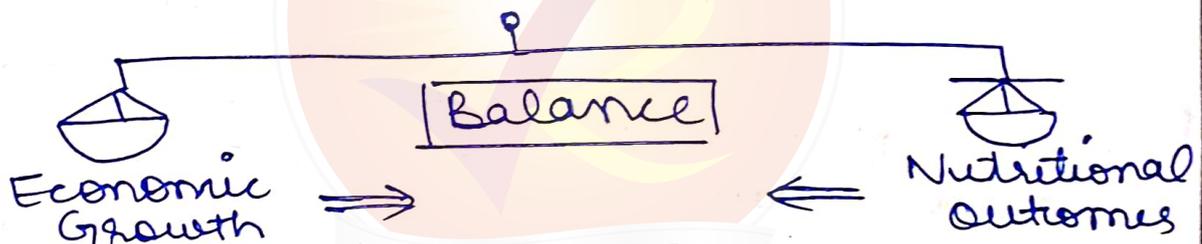

1. Inequality in economic growth.
Ex: top 1% hold 60% of wealth and bottom 50% hold 3% wealth (Oxfam)
2. Prevalence of social evils like patriarchy, child marriage
Ex: 1 in 3 child brides are from India.

3. Lack of Diversity in Food :

Ex: As per UNICEF data, 77% children in India between 6-13 month lack minimum diversity in diet.

4. Poor implementation of initiative like PDS Ex: leakage and corruption in PDS

5. Growing trend of fast foods like pizza, burger, etc. Ex: 16% of Indian population is obese.

1. Preference for super foods like millets.

2. Initiatives like Fit India Movement and 'Eat Right challenge'

3. Participative development.

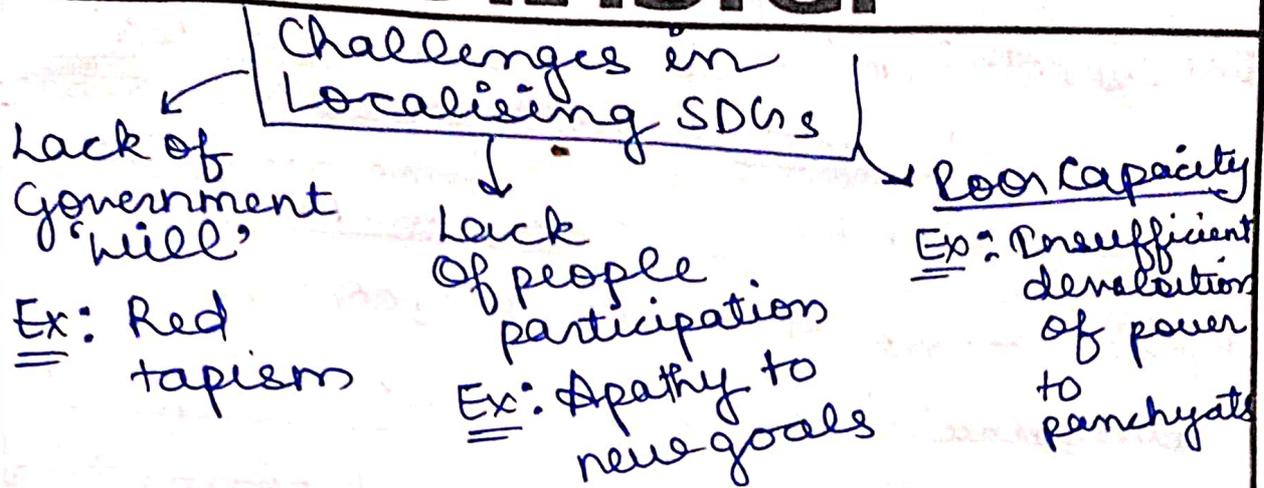

Ex: Amartya Sen Approach of Capability Building

To realise goal of zero hunger (SDG 1), priority to Nutritional outcome should be given

Q-4 Sustainable Development goals are 17 goals that all UN member States have to achieve by 2030

Localising SDGs as a governance imperative -

1. Last mile delivery and connecting to grass root level. Ex: NITI Aayog Aspirational District Programme.
2. 'Jan Bhagirdari' - to make it a people's movement.
Ex: Raepara Village, Tripura became first Bio Village
3. Customising needs - as per demands of locals.
Ex: Tailored solution of road development in Vyara District for hospital.
4. Balancing Development - as per NITI Aayog's Data southern states are achieving more in SDGs than Northern States.

Localising SDGs not just as policy choice but as governance imperative by following measures-

1. Devolution of power to Panchayati Raj institutions in letter and spirit.
2. Approach of 'Sabka Sath, Sabka Vikas and Sabka Vishwas'
3. Focusing on Minor areas -
Ex: NITI Ayog Aspirational BLOCK Programme
4. Constant evaluation and feedback
Ex: Social audits.

Localising SDGs is sin-quo-non to achieve them by 2030.

8-5 Foreign Contribution Regulation Act (FCRA) is legislative act to manage foreign funding in India.

FCRA as regulatory necessity -

1. to manage misappropriation of funds. Ex: 20% of total funds on administrative expenditure
2. to counter money laundering and shell companies Ex: receiving more than 10 lakh need to be informed to RBI.
3. Sabotaging foreign interests
Ex: As per IB Report, 2-3% GDP loss due to 7 specific protests
4. Formalisation and Accountability
Ex: renewable of registration within 5 years.

FCRA as a Constraint to civil Society -

1. Lack of autonomy : Ex: NGOs like Pratham need more funds on administrative expenses than 20%.
2. Overregulation - Ex: FCRA Account can only be opened in SBI, Delhi Branch
3. Invasion into privacy : Ex: Provision of details of all employees Address in FCRA Act.
4. Cancellation of FCRA registration without due hearing.
Ex: FCRA licence of 20693 NGOs cancelled in last decade.

Way Ahead

upholding National Policy on Voluntary sector, 2007
i.e; Safeguard Autonomy, ensure Accountability

↓
Portals like 'NGO Darpan' for Transparency.
Bridging Trust deficit between government and NGO.

Hence, balanced Approach is needed in FCRA.

Q-6 'AI' is the new age technology that can process meta data and make decisions like human brain

Objectivity
and
fairness
in decision
making

Benefits of
AI and
Big Data

Fast
decision
making
Ex: identifying
Beneficiaries

aid human
effort
Ex: RAHAT APP
use for predicting
Disasters.

Processing
huge data
Ex: census
for particular
information

Risk involved of AI and Big data
in governance

1. Lack of compassion and empathy
Ex: exclusion of BPL beneficiary
due to spelling mistake

2. Risk of biasness in policy making
Ex: Amazon recruitment AI tool
excluding women.

3. Black box problem - about how
it is made and use of
algorithms.

4. Privacy issue - due to processing of huge data.

Balancing with Justice and Transparency -

I. JUSTICE

1. Equity in accessibility Ex:
concept of net neutrality
2. Fair Use practice Ex: allegation
of Intellectual Property right
violation.
3. Just approach - Balancing with
human heart.

II. Transparency

1. Legislative measure like
^{Personal} Digital Data Protection Act, to
be enforced.
2. Indigenous tool with local
data Ex: AI Bhashini
3. Reducing bias and Privacy
issues with international
collaboration.

Hence, NITI Aayog # AI for All
approach should be followed.

Q-7 As per Census 2011, About 2.02% of population come under PWD category.

Reservation

5% in education

4% in jobs

Legal Safeguards
under RPWD Act,
2016

21 type of disabilities
Ex: including
aid attack
victims

Provisions for
accessibility
and Benchmark
Disability (i.e., 740%)

making them
less stringent
Ex: for addition of
new disability
just need executive
decision.

SYSTEMATIC Barriers hindering
effective implementation -

1. Lack of proper infrastructure :
Ex: Public Buses not disabled friendly
2. Lack of awareness about reservation
etc.
Ex: 69% resides in rural areas.
3. Double Burden - on vulnerable
sections like child, elderly, women
Ex: 44% of total PWD are women

4. Social Stigma - more than just physical barrier. Ex: ~28% of disabled children never went to school (UDISE+ Data).

Ways to improve and overcome systemic barriers -

1. 'Sugamya Bharat' Abhiyan for accessible India. Ex: Delhi Metro.
2. Inclusive education
Ex: Dish Channel 31 for sign language education
3. Proper infrastructure for activities like Para Sports.
4. International collaboration.
Ex: Marrakesh Treaty which came into force in 2016.

For true 'Sarvodaya' we need inclusive development of PwPs.

Q.8 Steel Frame of India are the permanent executive which enforce government policy and ensure effective service delivery.

Issues with Indian Administration

1. 'Arm Chair Bureaucracy' away from grassroot level!
2. Red tapism in working
3. 'Chalta hai' attitude towards service delivery.
4. Vacancy in departments - Ex: only 442 IAS officers are working with centre against 1469 IAS officer required (DoPT)
5. high discretionary powers and colonial 'Babu' culture.
6. Lack of proper training and sensitivity towards Antodaya.

Issues
with
discarding

→ work as catalyst between
government and citizens

→ enforce government
policies and act
as permanent executive

work on
grassroot level
and bring change

Ex: IAS Dinya Derranjan
in moist areas.

Reinventing Indian administration

1. Proper training Ex: Mission
Karmayogi

2. PM Modi suggest 4 Pillars

• Gaur (Bride) • Kartavya (duty) • Vikas (development)

• Ekta (Unity)

3. 2nd ARC suggest of two proper
evaluation at 14 year of service
and 20 year of service

4. 'Kota Committee' recommendata
of establishment of 'Civil
Services Board' for Non artisanal

Hence ~~that~~ the need of hour is
transition from Karamchari (employee)
to Karmyogi (dedicated worker) approach

8.9 SC in its Aadhaar ruling upheld the use of Aadhaar for service delivery and identification of beneficiaries

Implications of government efficiency and citizen rights -

1. Act as identity for people
Ex: used in KYC verification

2. Easy accessibility of required data
Ex: all information at one place

3. Used in investigation
Ex: ASI Rajesh Kumar reunited children using Aadhaar Data

4. Easy delivery of services

Challenges

1. Not an appropriate identity for citizen

Ex: Anyone who stayed for more than 180 days in India can have Aadhaar.

2. Privacy issues

Ex: News of Aadhaar data leak on Dark web

3. Exclusion of beneficiaries due to lack of Aadhaar

Ex: Jan Dhan Yojana Account

Positive

Ex: Use of Aadhaar to withdraw money within seconds.

4. Processing of personal data by private sector for personal gains

5. Not a proof of date of birth

Therefore, using Aadhaar as sole measure to authenticate create many issue. Hence following measures need to be taken -

- ① Flexibility - use of other identities like passport, 10th Marksheets
- ② Fixation of error - in mobile number, etc.
- ③ Proper safeguards to process data. Ex: Digital Personal Data Protection Act.
- ④ establishing proper guidelines for private sector.

Therefore, it should be balanced with Article 19 (Right to privacy)

8-10 Citizen Charter is a written document that provide commitment to citizens for quality service.

It bridge the gap between expectation and performance by clearly laying down quantitative measures of performance for appraisal.

Vision _____
Mission _____

S.NO.	Service	Time	Cost

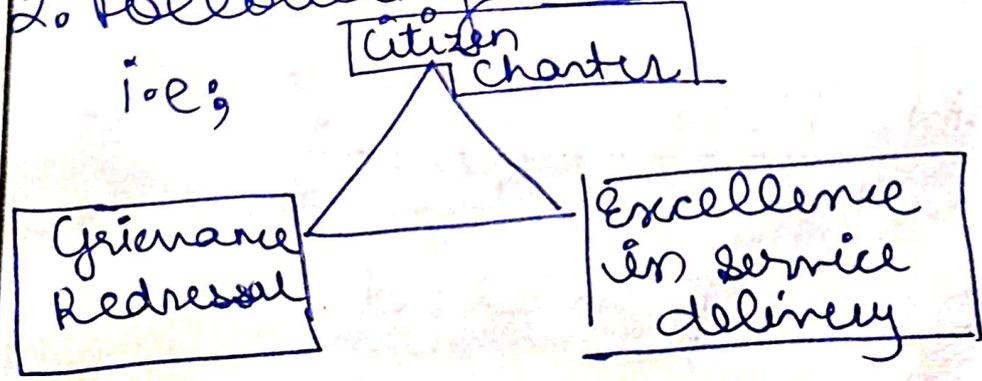

Grievance Redressal _____
Expectation from customer _____

FRAMEWORK OF CITIZEN CHARTER

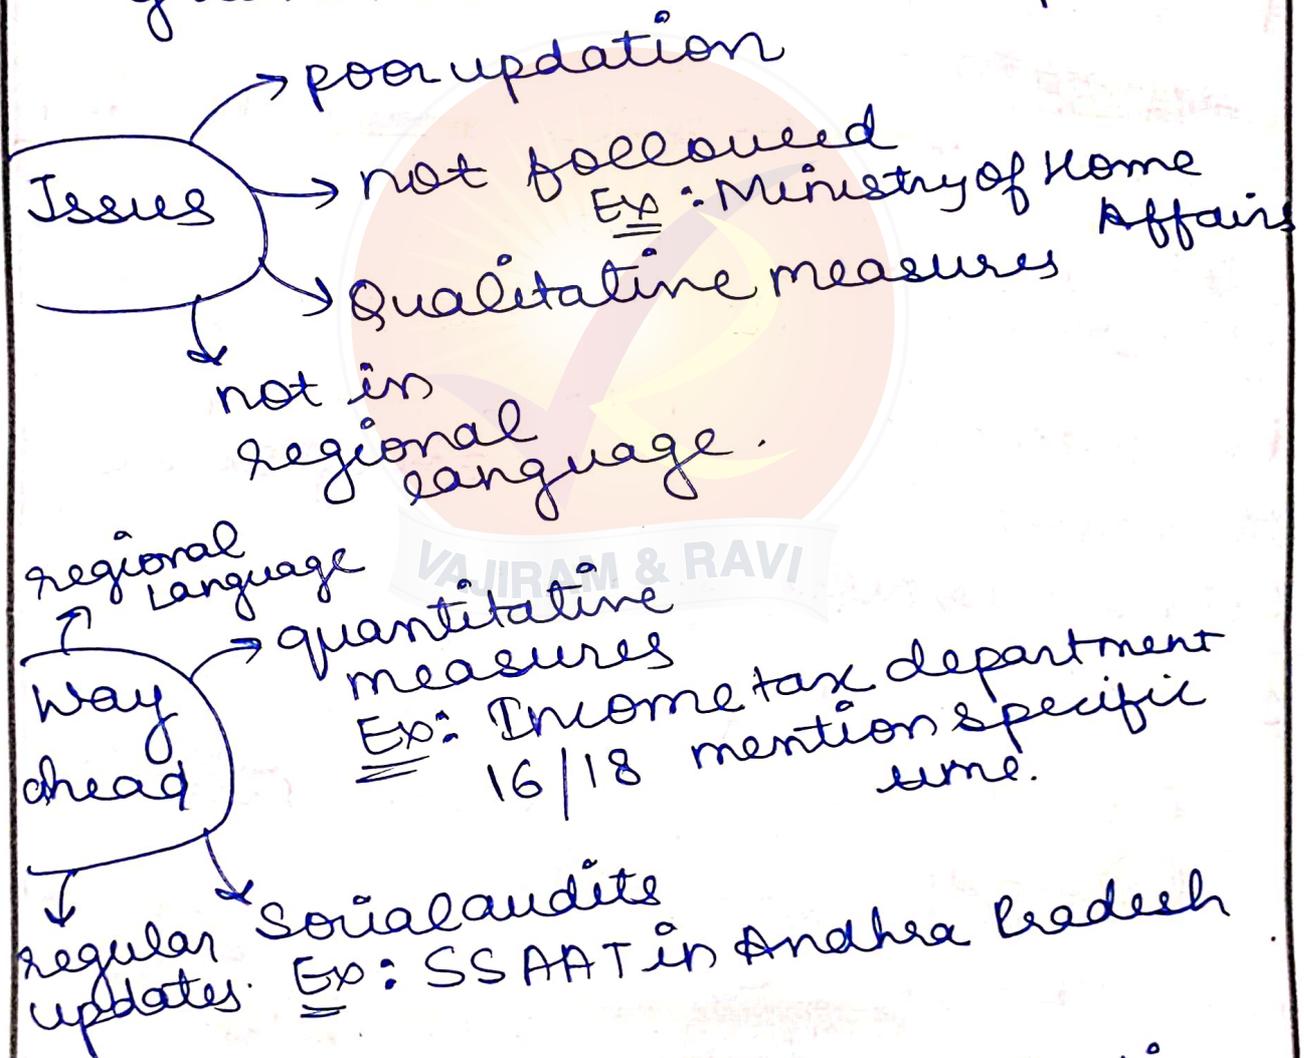

Relevance in strengthening citizen centric governance :

1. Active participation of citizens by involving them in service delivery.

2. Following Sevottam Model

3. Two-way process Ex: Mayurbhanj
Charter 'window of hope'
4. Accountability Ex: ~~Ex~~ Ministry
of Rural development using
QR code on roads.
5. Problem solving by proper
grievance redressal at place.

Hence, BIS 15700: 2005, Indian Standard in service delivery need to be upheld.

Q-11 Mb Kar Rape Case (Kolkata),
wrestlers allegation against WFI
are some prominent example
of past year i.e; Cases of
workplace harassment.

wide definition
of sexual harassment

Ex: physical,
verbal,
action
etc.

Internal
Committee
in organisation

Provisions of
POSH Act,
2013

Open communication
and safe space
for women
at workplace

SHe-Box
online portal
to report case

GRAPS in implementation of Act -

1. Poor implementation: Ex: between
2013 and 2022 less than half
allocation of Nishchaya Fund.

2. Victim Blaming: due to biases
and stereotypes. Ex: Character
assassination of wrestlers on
National news.

3. Unorganised workforce like househelps, etc and lack of proper system to report wrongdoing.
4. Poor enforcement of internal committee at workplace
5. Use of fear, coercion, etc to withdraw the complaint.
6. Against principles of Natural justice - Ex: SC Judge hearing case under POSH Act against him, by himself.

Measures to ensure better compliance -

1. 'Hema Committee' recommendation for strong role modeling of women.
2. Strict enforcement of Internal complaint committees and District complaint committees for unorganised sector.

~~Q. 3~~

3. Breaking Stereotypes and Bias

Ex: SC rulebook that called
for exclusion of words like
Career Women \Rightarrow Women

4. Ensuring safety of women

Ex: use of CCTV cameras,
pick and drop services.

5. Anonymity of complainant - to
avoid any kind of coercion.

6. Increasing women labour
force participation Ex: Nari
Shakti Vandham Adhiniyam

Therefore, on the road of
'Nari Shakti se Viksit Bharat'

we need to ensure protection
of women employees.

x

Q-12 'Swachh Bharat Mission' is a Jan Abhiyan for cleanliness launched in 2014. Where Jal Jeevan Mission is launched to ensure access of 55 liters per capita tap water daily to rural households.

Progress and their report card

Swachh Bharat Mission	Jal Jeevan Mission
1. 95% villages declared ODF+	1. <u>11 States / UTs</u> provided 100% tap water to all rural households
2. 710 crore pucca toilets in rural areas	

Key to public health and environment sustainability goals

1. accessibility of comprehensive WASH (water, sanitation and health) services

~~Q.1~~
2. Health improvement :

Ex: SBM 2.0 and 1.0 helped to prevent 3 lakh diarrheal death in 2019 compared to 2014 (WHO)

Ex: cases of wasting 58% higher in Non ODF Villages

3. Environmental sustainable goal - like proper sewage drainage and treatment of liquid and solid waste

Ex: less use of Borewell due to tap water

4. Women and her health

Ex: 93% women feel safer with toilets at home (UNICEF)

Ex: 5.5 crore hours daily saved for women collecting water (WHO)

Structural challenges -

1. Lack of proper utilisation of funds

Ex: Only 19.5% budget utilized of SBM in FY 2024-25

2. Unsustainable practices

Ex: Under JTM 52% of ground water is used.

3. Poor Behavioural changes

Ex: Use of Toilets to store dung cake

Ex: Concept of water lines in Rajasthan

4. Skewed performance and disparity between states.

Solutions to improve -

1. Extending the Programme Ex: JTM extended till 2028.

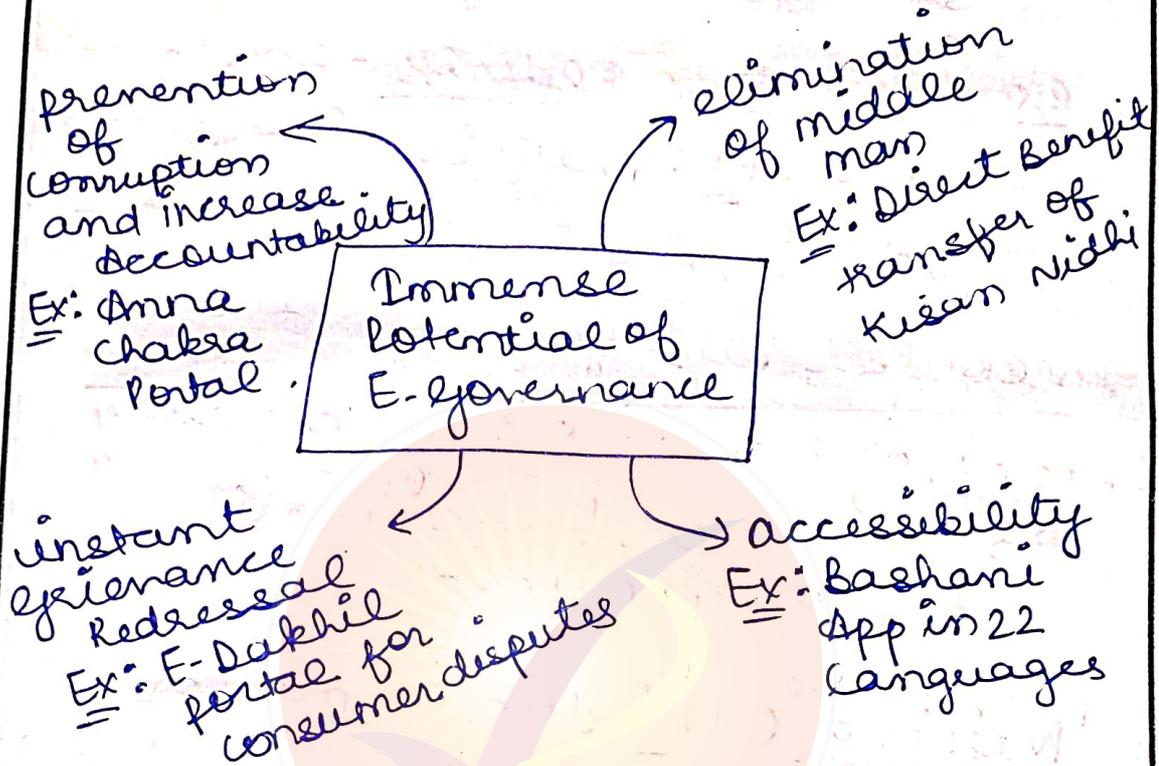

2. Nudge Practices for behaviour change.

3. Competitive Federalism for ranking

Ex: NITI Aayog Swachh Bharat Sarvekshan.

To achieve SDGs by 2030 both mission should be enforced on Mission Mode.

Q-13 E-governance is used of Information and communication technology to enhance consumer experience during service delivery.

Diverse Models of e-governance adopted in India -

1. Government to consumer where services are directly transferred
Ex: LPG subsidy directly into Bank A/c
2. Government to Businessman for ease of doing business
Ex: faceless tax submitting like GST Portal.

3. Government to government - at horizontal and vertical levels
Ex: Gati Shakti portal for synergy in efforts.

4. Government to elderly - for targeted schemes. Ex: New Pension Scheme

Limitations of diverse model followed by government -

1. Lack of accessibility Ex: Only 33% women have used internet (NFHS-5)

2. 'Missing out' due to minor errors like spelling mistakes

3. Cyber crime on rise Ex: Digital arrest.

4. Low IT literacy with vulnerable sections of society.

5. Resistance to change by some sections of society.
Ex: Low adoption of soil health card →

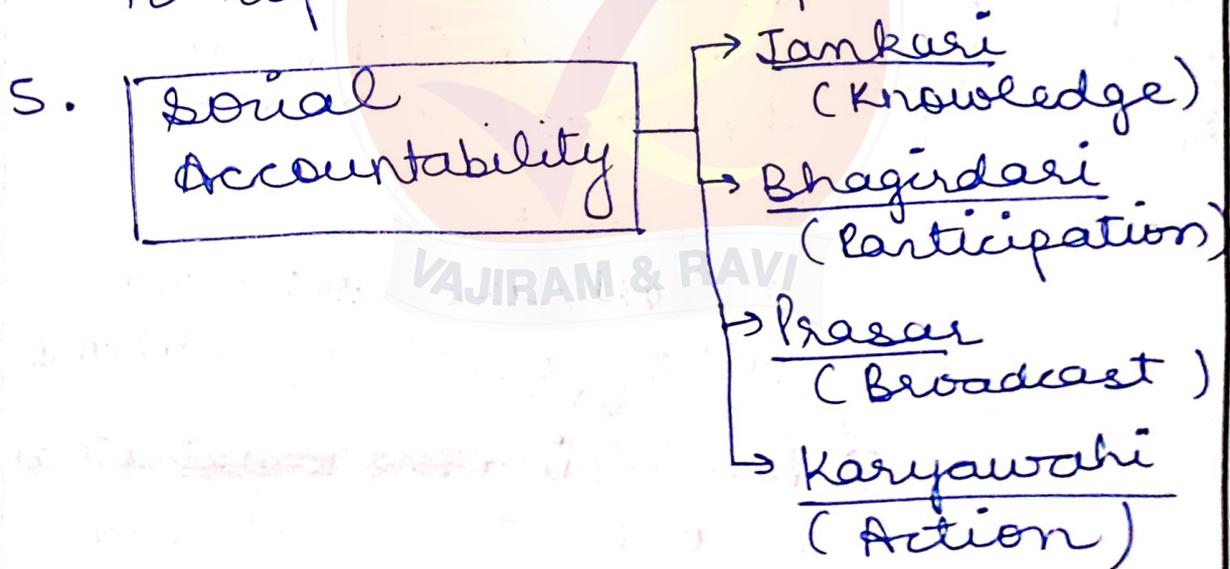

Key improvement strategies -

1. Participation of citizens in policy making. Ex: Brazil for Budget making.

2. KISS Approach of 'Keep it short and simple'

3. Capacity building and Awareness ~~is~~ about potential cyber crimes

4. Public - Private Partnership :
to rope in their expertise

The way Haryana government have launched 'Antodaya Saral Portal' for all services at one place, at centre level this should be replicated with inclusivity.

9-14 '2025' is celebrated as UN International Year of Cooperatives with theme- 'Cooperatives build a Better World'. This ethos provide potential in healthcare delivery.

Rural Health care Gap

- ① lack of preventive healthcare.
- ② Presence of Quacks
Ex: 1 out of 5 doctor only, holding degree
- ③ NO integration of AYUSH in primary healthcare
- ④ huge cost on Tertiary healthcare. Ex: ~ 48% out of pocket expenditure
- ⑤ low insurance penetration
Ex: only 14% rural areas.
- ⑥ Urban oriented speciality hospitals.

Potential of cooperative model in strengthening rural healthcare —

1. 'Bridging the Gap' - left by earlier models and reaching weakest of weak.
2. Participatory Model - where they can collect their saving and a member can use in case of emergency.
3. Partnering with qualified doctors on revenue sharing model.
4. Training to some community people as a Nurse, attendant.
5. Awareness about preventive healthcare and Non-communicable disease. Ex: Vaccination drive
6. Establishing 'health ATMs' for check-ups on fees basis.

Challenges with this model -

1. Lack of funds - checkup machines, qualified doctors, healthcare centre need a lot of money.

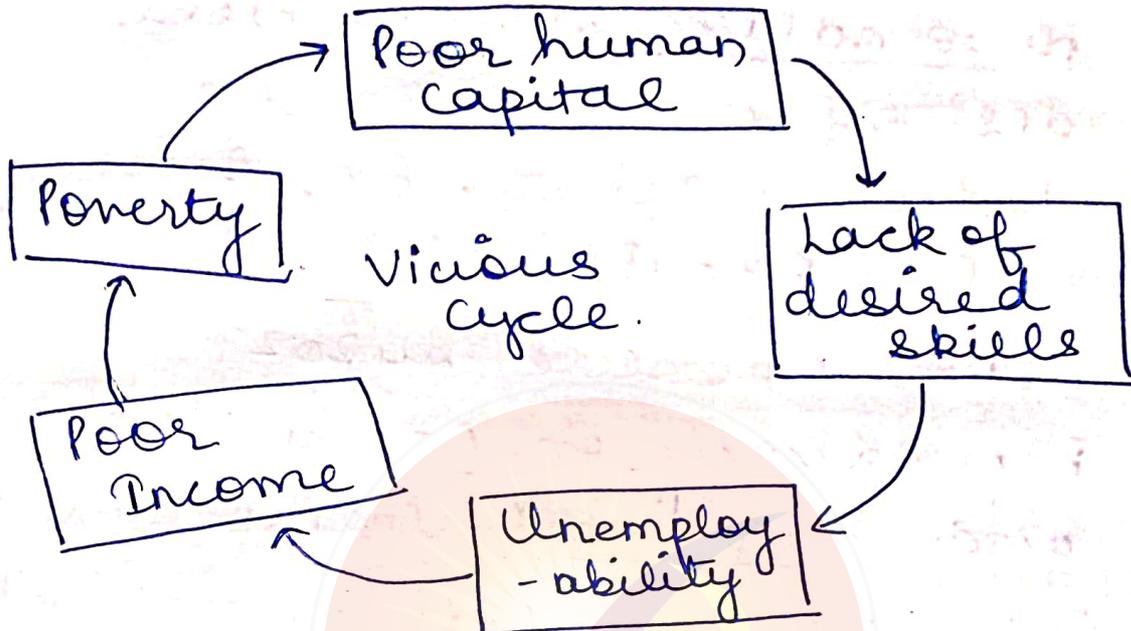

U.P.S.C.

Question No.
प्रश्न संख्या

2. Lack of knowledge - healthcare system need specialised knowledge which local community lacks
3. 'Fear of Unknown' while working on this model.
4. Lack of trust by people in rural areas.
5. Lack of will - qualified doctors don't want to practise in rural areas.

For 'Sahakar se Samridhi' in rural healthcare we need government handholding, proper training and trust building.

Q-15 As per Skill data, only 5% of Indians are vocationally trained.

Key structural constraints -

1. 'Gaps' in education system -
Focus on rote learning
Ex: As per Narayan Murthy studies
only 20% IITians are employable
2. Poor spending on Research and development - only 0.6%.
GDP Spend (2024-25)
3. Poor quality of skill training

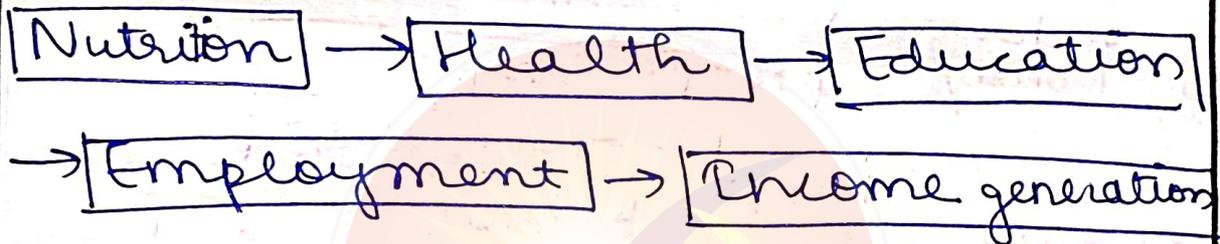

4. Malnutrition: About 35% ^{children} suffer from stunting and 19% are wasted
5. Automation and AI: will destroy many jobs in Indian market. Ex: As per WEF, 83 million jobs will become obsolete by 2027
6. Dependency on Agriculture and disguised unemployment
Ex: ~ 46% population employed in agriculture.

Targeted Reforms to Strengthen human capital and efficiency -

1. Developing proper syllabus for vocational education
Ex: National Skill Curriculum Framework, 2013 is too old
2. Skill training like PM-Vishwakarma scheme.

3. Bridging academia and industry gap - by providing those skills which are actually needed on Job.

4. Fit and Healthy India - by targeted reforms following life cycle approach.

5. Women Labour Force Participation - Ex: IMF have said equal women participation can increase GDP by 27%.

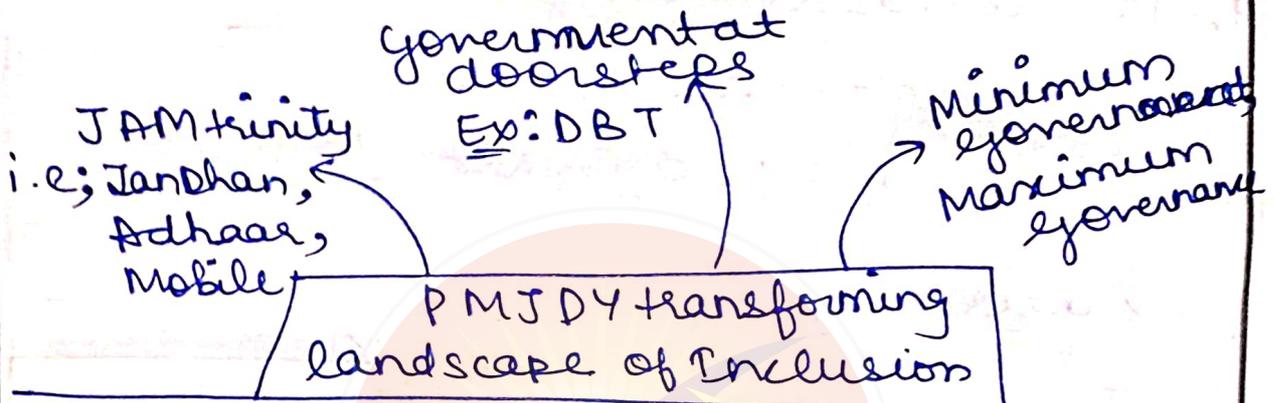

6. Labour Market reforms - by enforcing labour codes, 2019 at state level.

7. New age technology adoption
Ex: India Semiconductor Mission

So, ~~the~~ need of the hour is REFORMS.

U.P.S.C.

Q-16 PM Jan Dhan Yojana (PMJDY)
is a financial inclusion scheme
launched in 2014. Which
lead to ^{39%} women owning Bank
accounts in India

Challenges in bridging gap

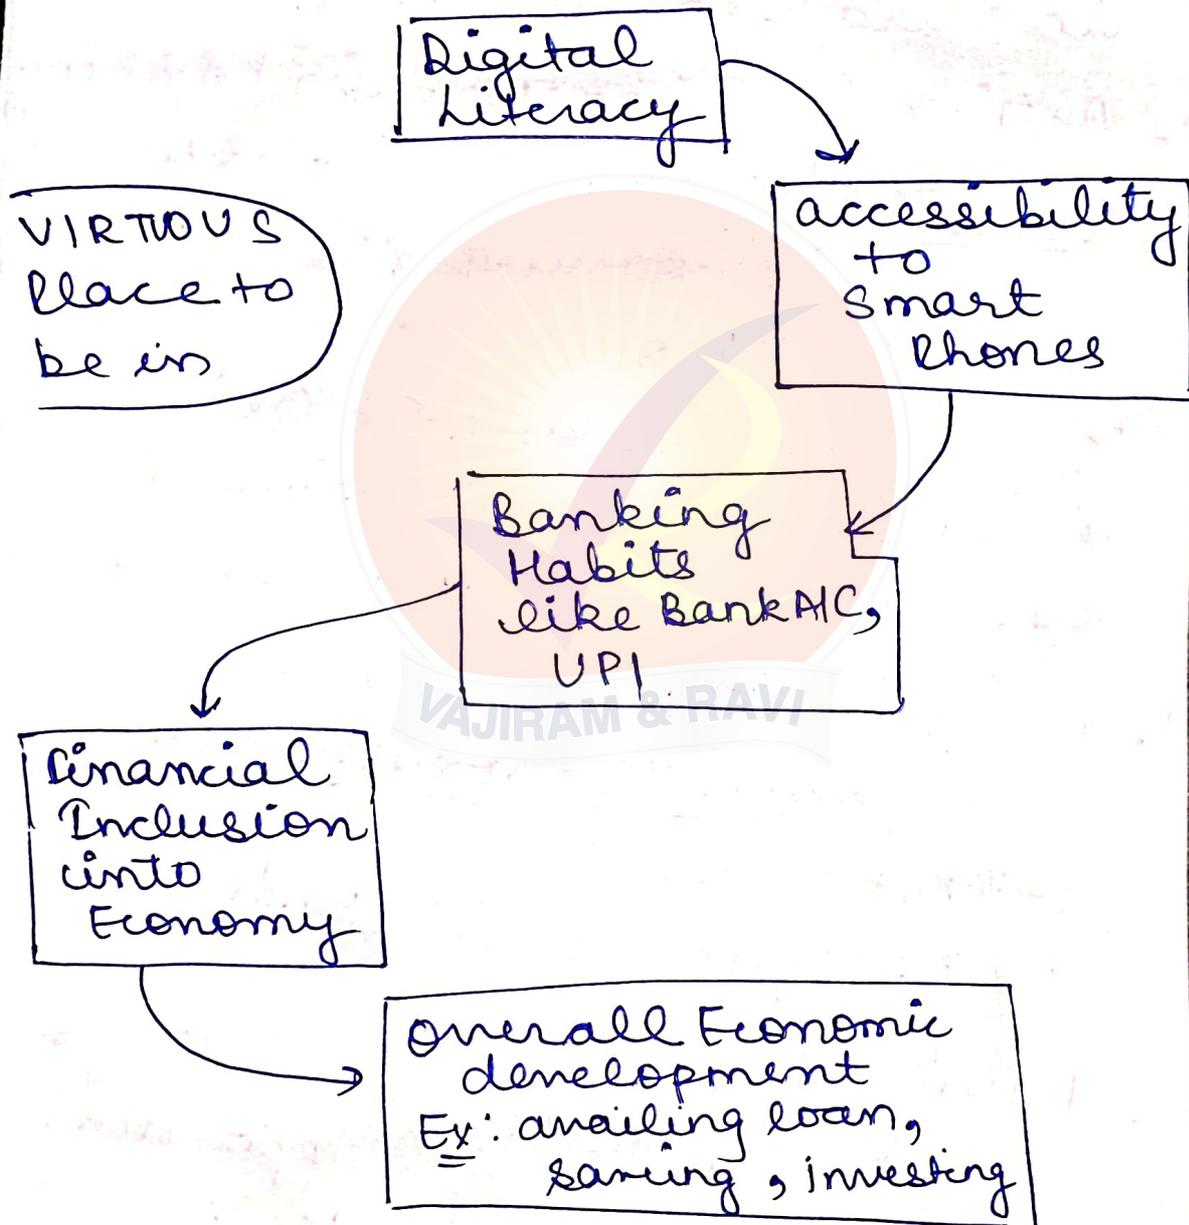

Accessibility		Utility
1. More than 40% women have bank A/c in rural areas	↑	1. Bank A/c lying <u>'DORMANT'</u> for years
2. Rs. 10000 overdraft facility available in JANDHAN A/C	↔	2. Prevalance of <u>Moneylender</u> in rural areas
3. Every A/c can have ATM card and access to UPI.	↓	3. Digital divide with low adoption of UPI by Vulnerable Section

Multidimensional approach for financial engagement and financial resilience -

1. Digital literacy Ex: Google Internet 'Saathi' train women in rural areas.
2. Active participation in banking habits Ex: taking loans, saving, etc in Bank A/c
3. 'One Branch, One SHGs' initiative for financial engagement.
4. Facilitating financial engagement - Ex: SNAMITVA scheme for providing legal rights of land in villages
5. Nudge practices - for change in behaviour. Ex: Appointing ANIMATOR for awareness.

6. Maintaining Privacy and
reducing risk of cyber crimes

Ex: thumb impression during
Aadhaar enabled payment
System.

For Jan Dhan Yojana to achieve its true goal, enforcing utility is the key.

Q-17 Article 17 of constitution deals with abolition of untouchability in all its form.

Issues with National Commission for Safai Karamcharis

1. Non-Constitutional body unlike National Commission of SC & ST.
2. Toothless body : cannot enforce its decision and punish the culprits.
3. Poor enforcement of Prohibition of employment as Manual Scavengers and their Rehabilitation Scheme, 2013.
4. Prevalance of Manual scavenging, non availability of safety gear and caste discrimination.
5. Lack of resources and vacancy in commission.

Imparting Constitutionalality to NCSK would lead to -

1. Constitutional Mandate against Manual scavenging.
2. Power of Civil court to investigate
3. Suo Moto Powers to look into issues.
4. Separate budget allocation for welfare and rehabilitation
5. Appointment under President hand and seal

But is ensuring constitutionality is sufficient. No! because of following reasons -

1. Age of practice based on Untouchability Ex: Purity / Pollution
2. Social stigma Ex: Supreme court report on how caste based activities in vision.
3. Behavioural issue in prope mentality.

Other ways to improve safai
Karamcharis true dignity and equality

1. Symbolic practices like Inter dining with them by big leaders.
2. Technology use Ex. Kerala 'Bandicoot', robotic scavenger
3. Government initiatives.
Ex: NAMASTE scheme.
4. Overall Development - Skill training, capacity building etc.
5. Awareness - about reporting manual scavenging, social inclusion practices, etc.

Hence, to achieve Gandhi's 'Swraj' inclusive development and eradication of caste is all the way more important.

Q-18 As per Census 2011, 31.15% population live in urban areas, up from 19.9% in 1971. This highlights the growing migration trend.

Challenges of integration and service delivery in urban centres

1. Unplanned Urbanisation leading to sprang up of slums, poor housing - Ex: 16% urban population live in slums.

2. Issues with service delivery - Ex: change in residence address but no change on voter ID card.

3. Poor service delivery due to rising population and lack of planning on various levels-

3.1 Transportation: Traffic Jams, poor public transport

3.2 Solid waste Management in slum areas, etc

4. Rise of Informal labour like

Street vendors, construction workers, gig economy.

5. Poor social security benefits to vulnerable sections

6. Rise of Regionalism - Ex:
son of soil Approach.

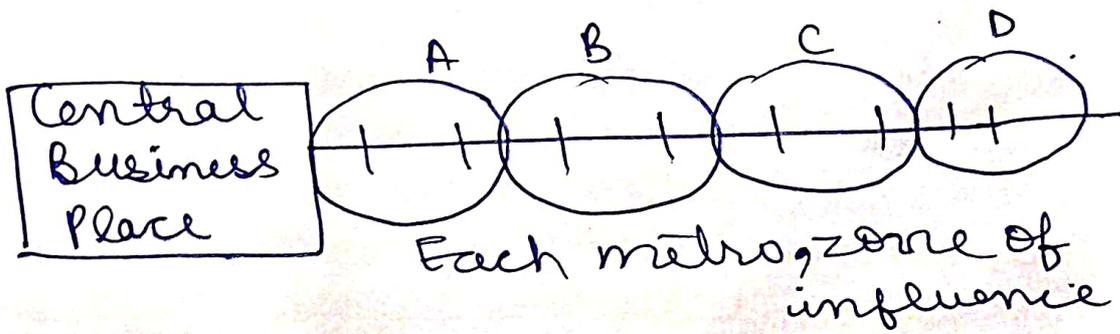

Ways to strengthen Migration support system -

1. Government policies like One Nation, One Ration Card at all India level.

2. Inter State coordination to provide social security benefits.

3. As per NITI Aayog recommendations like National Metro rail policy waste to energy authority.

4. Transit Orient Development

5. Employment generation ~~of~~ in source states like UP, Bihar, Rajasthan, Madhya Pradesh.

6. Skill training and financial help like PM Saurahi for Street Vendor, Skill India

7. Schemes like RURBAN mission to develop cluster of SMART villages -

As per world Bank ₹ 70^{Lakh} crore is needed for investment in Urban India. Therefore Public

Private Partnership, KV Shivarama
- Krishan Committee recommendations

should be adopted.

x

Q-19 Virtual Digital assets are Intangible so called assets traded on online platform using block chain technology.
Ex: DOGE coin

Issue with lack of clear regulatory oversight -

1. Uncertainty in Market about possible tax structure, regulatory measures.
2. Trading in Black market due to absence of authority like SEBI.
3. Blanket tax of 30% hurt sentiments of investors.
4. Misuse of VOAs in act of terrorism, Money Laundering
Ex: Ransomware attack for crypto currency.

Institutional Reforms to regulate VDA sector -

1. legislative measure - like amendment to Informational Technology Act to define VDA.
2. Regulatory measures - establishing regulatory body like RBI, SEBI to regulate VDA sector.
3. Government innovation like ~~placet~~ pilot project of Central Bank Digital Currency by RBI.
4. Choosing between two approaches like complete ban by China or maintenance of reserve by USA government.
5. International collaboration with OECD countries to establish global regulations.

Hence, a balanced approach for new technology to prosper but restricting its risks should be the way ahead.

X

Q-20 Article 19(1)(c) provides for freedom of association underlining essence of free civic space in democracy.

Role of civil society organisation in strengthening democracy -

1. Advocacy for rights of others
Ex: Naz Foundation fought against Article 377.
2. Catalyst for social change -
Ex: NGO India against corruption fought to pass Lokpal Bill 2013.
3. Watch dog - to enhance transparency and accountability
Ex: social audit
4. Partners in policy formulation and implementation
Ex: Pratham NGO publishing ASER report
5. Service provider to vulnerable sections.

Ex: Khalsa Aid during Covid - 19.

Challenges faced in current
regulatory environment -

1. Legislative challenges like FCRA amendment in 2019 to make it more stringent.
2. Lack of 'trust' between government and civil society organisation
Ex: 20693 licences cancelled in last decade.
3. Work in 'SILOS' that lead to duplication of efforts.
4. Increased regulatory oversight and labelled as Anti National and anti government
5. Lack of flexibility Ex: only 20% of funds used on administrative expenses

Suggestion for increasing participation between government and CSOs -

1. 'trust building' on both level
Ex: NbO Darpan portal
disclosing financial funding
2. National Policy on Voluntary Sector, 2007 recommendation of
'Safeguarding AUTONOMY,
ensuring ACCOUNTABILITY'
3. Stakeholders in development.
4. flexibility in working and
safeguarding against
over regulation.

As B R Ambedkar have said 'Cooperation is not mere policy. It is a socio-economic necessity for survival of community'. Hence CSO should be partners in development.
